PLANNING AND DESIGN PHILOSOPHY

The planning and design philosophy of Castle Highlands is to encourage consistent quality and design expression throughout its boundaries, while allowing for individuality of architectural expression by its Owners.

The guidelines, procedures and information herein define the means by which homes built at Castle Highlands can be compatible with each other and with their unique setting. These Design Guidelines are the criteria for judgment and form the basis of control by the Architectural Review Committee.

These Architectural Guidelines may change from time to time to reflect new experiences and changing conditions without modifying their overall intent.
